Founded in 1988, **TENOR** is a services company focusing on EDI exchanges (Electronic Data Interchange) and BtoB electronic commerce.

Independent software vendor, **TENOR** has developed EDI / Web EDI **eCar®** services suite through a SaaS mode (*Software as a Service*)

With customers located in more than 40 countries, **TENOR** is addressing especially automotive industries, and also aerospace, retail, logistics services...

eCar® suite includes following set of services:

eCarEDI: hosted EDI services offer, replaces your EDI station, and frees you completely from your EDI issues, at a lower cost. **eCarEDI** is a set of EDI services available through Internet, fully integrated to your applications and featuring automatic interface capabilities complying to your ERP data management constraints. Translation services and telecommunications are totally managed by TENOR.

eCarWebEDI: The market reference offer. 1st Web EDI solution homologated by GALIA & ODETTE and by the most of automotive manufacturers and industries. Better suited to handle low volumes, **eCarWebEDI** has been designed as a true application system, allowing a company with no EDI capabilities to exchange logistic and accounting data with its business partners running EDI, improving delivery quality and increasing its service rate level to satisfy its partners' requirements.

Recognized since more than 20 years, **TENOR** offers expertise in information technology and telecommunications domain delivered as consulting, development and training services.

TENOR is experiencing a strong growth of his customer base, both France and international.

Customers select **TENOR** for his EDI expertise, his professional relevance, his proactive support and select **eCar®** services suite for his high quality level and for his acceptance by the biggest leading companies in every industry.
