- Turnover : 40 M€

Industry:

Forming, bending, assembly set of hose for diesel motors. The main activity is the manufacture of High Pressure Injection Tube for diesel engines.

L'ERP:

SILVER-CS

senior
Flexonics

Senior Flexonics activity is completely dedicated to automotive industry. The manufactured products are high pressure tubes for diesel fuel injections systems, diesel fuel rails, piston cooling jets, turbo oil drain and fill lines.

Tier 1 OEM, the company works directly for car manufacturers. Nowadays **Senior Flexonic** exports in 28 countries and has an important position in manufacturing industry as first European constructor with 60% of the market, and 40% for the worldwide one.

The Project :

The change of the ERP is due to Several elements. First their old ERP didn't integrate the automotive specificities, and had no capabilities of evolution regarding the internal requirements. However the automotive involvement of Senior implicated answering to the EDI customers demand and also to the Renault and Peugeot new projects Logistique Alternative and Cindi. That last point was the trigger of the Erp's change.

« all the existants functionalities of SILVER-CS has been implemented, Production management, sale, purchase, accounting finance”, explains Catherine Onfroy ERP project Manager,” and all the automotive modules was installed too, open orders, EDI exchanges, labels management, provider service rate, sustainable packaging... “

The strategy of the site is:

- To be recognized as the Reference in its business
- Continuous improvement strategy: products, production, services
- Involve the staff, integrate their suppliers in our improvement approach
- Perpetuate the company: profitable growth
